CHEMBETI MYDHILI

+91 8125145335 | chembetimydhili@gmail.com | LinkedIn: linkedin.com/in/mydhili | GitHub: github.com/chembetimydhili-tech

PROFESSIONAL SUMMARY

Electrical and Electronics Engineering graduate (2025) with project experience in Python-based AI/ML, person recognition, image processing, and full-stack application development. Completed Qualcomm AI Upskilling training and developed a Python-based person-recognition project. Familiar with machine-learning workflows, model evaluation concepts, Generative AI, LLMs, and retrieval-augmented generation (RAG). Interested in applying analytical problem-solving, validation, and documentation skills to AI/ML solutions.

EDUCATION

B.Tech — Electrical & Electronics Engineering | 2021–2025
Sri Padmavati Mahila Visvavidyalayam | CGPA: 7.1/10

TECHNICAL SKILLS

Programming & Data: Python, SQL, C, JavaScript, MATLAB

AI / Machine Learning: Machine learning fundamentals, image processing, person recognition, AI/ML inference, model evaluation concepts

Generative AI: Large Language Models (LLMs), prompt engineering, Retrieval-Augmented Generation (RAG), model customization concepts

AI Risk & Governance: Model accuracy and robustness concepts, fitness-for-purpose, validation and monitoring concepts, risk assessment principles, responsible AI

Statistics & Quantitative Methods: Probability, regression and hypothesis-testing fundamentals

Application Development: FastAPI, REST APIs, React, SQLAlchemy, PostgreSQL, MySQL, SQLite, JSON, CRUD, JWT authentication

Tools & Engineering Practices: Git, GitHub, VS Code, Jupyter Notebook, debugging, testing, data validation, technical documentation, OOP, DBMS, SDLC

Standards & Frameworks — Learning: NIST AI Risk Management Framework (AI RMF), EU AI Act, COSO and ICFR foundational concepts

PROJECTS

Person Recognition | Qualcomm AI Upskilling Project

- Completed project-based AI upskilling in Python, AI/ML, and image processing.
- Built a Python-based person-recognition project and worked with image inputs in the recognition workflow.
- Applied image-processing techniques and AI/ML inference to interpret recognition outputs.
- Reviewed outputs and documented the workflow and learning outcomes.

Job Application Tracker | Full-Stack Web Application

- Developed an application-tracking system using Python, FastAPI, React, PostgreSQL, and SQLAlchemy.
- Implemented RESTful CRUD API endpoints to create, view, update, and delete application records.
- Added JWT authentication and user-specific data access; designed relational models using SQLAlchemy ORM.
- Managed schema changes with Alembic migrations and built an analytics dashboard to review application activity.
- Used debugging and testing to investigate API and database behavior.

Energy Management System | Hybrid Electric Vehicle

- Developed an energy-management model using MATLAB/Simulink and fuzzy-logic control.
- Evaluated simulation scenarios to study system response and control decisions.

CERTIFICATIONS

Qualcomm AI Upskilling Certification: Completed training in Python-based person recognition, AI/ML fundamentals, image processing, and interpreting model inference outputs; applied learning in a person-recognition project.

Industrial Automation with PLC — APSSDC: Completed training in industrial automation fundamentals and Programmable Logic Controller (PLC) concepts.

Embedded Systems — Vector India Pvt. Ltd.: Completed training in embedded-systems fundamentals and the interaction between software and hardware.

Internet of Things (IoT) — APSCHE: Completed training in IoT fundamentals, connected devices, and basic IoT system concepts.

STRENGTHS

Analytical thinking • Problem-solving • Attention to detail • Adaptability • Teamwork • Debugging • Documentation
